Holiday Inn Airport  
2707 Little Rock Rd., Charlotte, NC

**\$125** per participant  
*includes lunch*

### Program Participants Receive:

- Truck Reference Guide
- Interactive Training CDROM
- Compressor Testing DVD

Featuring **Mike Prokup**, author of many of the industry's training programs specialized for the HVAC Service Technicians.

Technicians attending will be able learn complete system performance from the low side of the system, to the compressor, to the condenser coil and back to the metering device. This program covers **total system performance** allowing the tech to analyze an A/C system and identify application problems that cause poor system performance and reliability.

### Seminar Consists of:

- **Compression cycle analysis with R-22 and R401A**
- **Eliminating poor performance in the suction side of the system**
  - Evaporator coil operating characteristics: Fixed metering
  - Evaporator coil operating characteristics: TXV metering
- **Eliminating poor performance in the high side of the system**
- **Solving compressor problems**
- **Managing POE Oil in R410A Systems**

Upon completion of the program, you will know how to ensure proper operation of the system based upon understanding what it take to make the system perform at its peak capability. If the system is malfunctioning, you will be able to analyze the system and determine the problem without the guesswork *saving valuable time and increasing customer satisfaction!*

To Register simply complete this form and return it to the one of the following D&L Branches by April 1, 2020:

- Raleigh Fax: 800-662-4528
- Durham Fax: 919-220-6204
- Charlotte Fax: 800-557-2184

*If you have any questions please contact your local D&L Branch.*
